Printing Instructions

There are two versions of this resource you can use:

SIDE-BY-SIDE VERSION

This version's view places each "card" side by side on an 8.5 x 11 inch sheet of paper.

It would be great to ...

- Download and share electronically with households
- Print and staple pages together like any multi page document

TWO-SIDED CARD VERSION

The layout of this version was meant to be printed two sided on 8.5 x 11 inch letter size paper and then cut apart as half page cards.

The flow of this document will not make sense otherwise.

Print instructions:

- Consider printing on a heavier paper or cardstock
- Set printer to print landscape
- Two-sided print
- And to flip on the SHORT edge
- Cut each sheet in half to separate cards
- Order the cards

Idea: punch a single hole in the top corner and slip the cards onto a small binder ring to help hold the cards together.
